

The main promotional banner features a vibrant orange and red background. On the left, the text 'TWIST & MYST' is written in large, bold, white letters with a water droplet effect. Below this, the text 'Introducing XanthoMyst™ Nanoemulsion Myst' is written in a smaller, white font. A white button with the text 'PRE ORDER NOW!' is positioned at the bottom left. On the right, a 20mL tube of XanthoMyst Nanoemulsion Myst is shown, surrounded by several mangosteen fruits, some whole and some cut open to reveal the white, segmented flesh. A 'PRE ORDER NOW' badge is located in the top right corner of the banner.

OF DISCOVERY

XanthoMyst™

**NANO-EMULSION DROPLETS SO TINY THEY ARE ABSORBED THROUGH THE
SOFT TISSUE OF YOUR MOUTH, SO THERE IS NOTHING TO SWALLOW.**

INTRODUCING

XanthoMyst™ Bio-Delivery Myst

From the moment you *Twist & Myst™* XanthoMyst™ into your mouth, you'll LOVE the way the tiny-nano bubbles adhere to the inside of your mouth. Next, our proprietary encapsulated, mangosteen **Xanthone-Rich** nanoemulsion 10xPURE™ technology, improves delivery and transfer of **XanthoMyst™** directly into your body bypassing degrading of gastrointestinal enzymes in the stomach.

Nanoemulsions are nano-sized emulsions that support the targeted delivery of active ingredients.

10xPURE™ technology nanoemulsions are tiny droplets of one liquid suspended within another liquid. Picture the tiny droplets that form when you shake an oil-and-vinegar mixture except these droplets are micronized to carry mangosteen Xanthones and nutrients throughout the body.

NANOEMULSION BENEFITS:

- Enhanced Bioavailability
- Better General Wellbeing
- More Potent Delivery
- Better Absorption
- Faster cellular penetration
- Get More of What You Pay For

WHY IS THE PRODUCT CALLED XANTHOMYST™?

“Xantho” is derived from the many natural xanthones including, α -mangostin being the most active, found in Mangosteen Pericarp (rind). *Twist & Myst™* your daily serving of XanthoMyst™ into your mouth to efficiently deliver these compounds into your body for superior potency and bioavailability. These compelling benefits are beyond anything else we have seen related to mangosteen in the market to date.

MANGOSTEEN FRUIT:

Gardenia mangostana is a tropical tree native to Southeast Asia. Over 200 xanthenes exist in nature and 40+ xanthenes, are said to be located in the Xanthone-Rich pericarp (rind) of the mangosteen fruit. Mangosteen contains phytonutrients like xanthenes and other groups of compounds, including anthocyanins, catechins, and flavonoids, all of which have their own list of studied therapeutic benefits.

- High in phytonutrients like Xanthenes
- Potent antioxidant
- Supports overall health & well-being
- Supports a healthy inflammatory response
- Helps boost immunity

PROBLEM & SOLUTION:

Unlocking Xanthone Bioavailability

Until now, the lack of **Xanthone** oral bioavailability has been said to limit the potent delivery and overall wellness associated with Mangosteen extracts. Our proprietary Xanthone extraction, formulation and 10xPURE™ nanoemulsion based liposomal delivery technology is designed to help increase the absorption of poorly bioavailable ingredients.

Adapting technology, already widely used in pharmaceutical manufacturing, the team formulated a 10xPURE™ nano emulsion based system that encapsulates the extracted natural xanthenes within liposomes designed to deliver more Xanthone-Rich active ingredients than previously thought possible. This proprietary technology supports bioactive Mangosteen derived Xanthenes as promising candidates for general wellbeing.

TECHNOLOGY RECAP:

- Extract *insoluble* **Xanthone** compounds into a concentrate
- Integrate concentrate into extremely stable water *soluble* liposomal nanoemulsion
- Deliver liposomal nanoemulsion via oral mist for access by your body
- Small micronized liposomal particles more easily absorbed by your body

TWIST & MYST™

XanthoMyst™ oral mist with liposomal nanoemulsion form tiny droplets that quickly adhere to the soft tissue and absorb more easily. Oral myst is a fast and effective delivery system to get your daily serving of mangosteen Xanthone-Rich nutritional ingredients.

DOES SIZE REALLY MATTER?:

According to the developing team, *the answer is YES!*

Keep in mind, generally the smallest size the human eye can see is about the size of dust at about 25 micros or larger. Our nanoemulsion is as tiny as 0.45 microns or less and the liposomes that release the mangosteen xanthenes and nutrients are up to ten times smaller. We see evidence of the 0.45 micron size because the entire emulsion passes through a 0.45 micron mesh filter without separating or coming apart while remaining stable.

LET'S PUT SIZE INTO PERSPECTIVE FOR YOU:

- The diameter of 1 strand of your hair is about 80 Microns
- Human Red Blood cells that travel thru your bloodstream are between 5-8 Microns
- **XanthoMyst™** liposomes are 0.45 Microns or less, supporting easier entry into your cells

IT'S NOT WHAT YOU BUY, IT'S WHAT GETS TO THE DESTINATION.

CAUTION:

If you have a reaction, stop immediately and consult with your physician. Do not consume if seal is broken.
